EXPERIENCE

Founder & CEO – Returno

2025 – Present

Returno – Digital Marketing & Branding Agency | Remote

- Founded and scaled a full-service digital marketing and branding agency, overseeing end-to-end client acquisition, strategy, and execution across multiple verticals.
- Architected brand growth strategies and social media campaigns for clients, driving consistent engagement growth and measurable business outcomes.
- Coordinated cross-functional teams of freelancers and contributors, streamlining project delivery and ensuring on-time execution across all client engagements.

Founder – GreenSakhi

2025 – Present

GreenSakhi – Sustainability Initiative | Remote

- Founded a sustainability-focused community initiative dedicated to promoting environmental awareness, responsible practices, and grassroots impact.
- Designed and executed awareness campaigns, coordinating volunteer teams and driving measurable community participation.
- Developed strategic partnerships with local organizations and community stakeholders, expanding outreach and amplifying the initiative's environmental mission.

PROJECTS

WhatsApp Academic Feed | Product Management, PRD, Base44

- Designed a product concept for WhatsApp Communities that organizes announcements, assignments, events, and notices into a dedicated Academic Feed while preserving the existing chat experience.
- Developed the PRD, defined the MVP, prioritized features using MoSCoW & RICE, and built an interactive prototype in Base44.

Uber School Mode | Product Management

- Designed a school transportation solution enabling recurring ride scheduling, QR-based student verification, and live trip tracking to improve safety and convenience for parents.
- Defined the PRD, MVP, roadmap, and key product requirements for the proposed solution.

LinkedIn Skill Evidence & Verification | Product Management

- Designed an evidence-based skill verification framework to improve recruiter trust using projects, certifications, work experience, and trusted references.
- Defined the PRD, MVP, roadmap, and key product requirements for the proposed solution.

Deforestation Detection via Deep Learning | Python, TensorFlow, VS Code

- Developed a deep learning model to analyze satellite imagery and identify areas affected by deforestation, enabling faster and more efficient environmental monitoring.
- Leveraged AI and computer vision techniques to identify forest loss patterns and support conservation efforts.

GreenSakhi Sustainability Platform | Community & Outreach

- Developed an initiative platform to centralize environmental campaigns, volunteer coordination, and community engagement, supporting active sustainability programs.
